Art Unit: 3753

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wrasman in view of Quirk.

Wrasman shows a molded ball valve body with oring seats 20 and stem ring 38. Quirk shows a ball with two stem rings. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used such a plurality of rings to seal the stem of Wrasman, for redundancy for example.
